## France key commentary

### Market developments

The French video market experienced a 7.4% growth in consumer spending on video software (physical carriers and online) in 2023 compared to 2021. The total French video market now represents a value of around EUR 3,4 billion.

In 2023, the French DVD/Blu-Ray market contracted by 14.1% in value compared to 2022, closing at EUR 192.1 million. The contraction of the physical market is due to several factors: the high level of internet piracy in the French market, the broad offer of free TV services and catch-up TV offer available to French audiences as well as the shift in consumer preferences towards online services, including subscription-based models.

Digital consumption (digital video transactions (sell-through and rental) and TV VOD) reached total consumer spending of EUR 3,2 billion, showing growth of 9% compared with 2022.

The online market experienced healthy performance in 2023, in particular as regards SVOD services, contributing to offsetting the declining market performance of the physical formats.

### Other relevant developments

In France, DEGI and SEVN confirmed the return the “VODays” consumer campaign in January 2024. This initiative brought to the market a week-long digital campaign across ten of the top digital retailer platforms in France offering audiences a selection of new and popular films at promotional prices across both sell-through and rental options
